

Evolving with the New Oil and Gas Industry

Production Management Industries

About PMI

With over 20 years of experience, PMI Energy Services is a leader in the energy services field, providing a full range of cleaning, environmental, and other oilfield services solutions.

Our team of dedicated, hard-working professionals is committed to providing customers with safe, effective and cost-efficient solutions that meet their individual needs.

At PMI, we ensure our team is deeply experienced and highly trained to provide quality service and technical expertise to help our customers every need.

PMI's broad service lines support offshore and land operations in the Gulf of Mexico and Lower Mid-Continent Basins.

Safety and Quality
We are dedicated to conducting business in a manner that protects the environment as well as the health and safety of our team, customers, contractors and the general public.

At PMI, we don't just publish a safety plan. Safety is one of our Core Values in all aspects of our business. In addition, we provide our team with the tools and training needed to perform their jobs safely and correctly. We firmly believe that there is no service or job so urgent that we cannot take the time to complete it safely.

Our safety program includes a behavioral-based process with the purpose of promoting communication between personnel working together to recognize hazards, minimize risk, and improve safety performance.

Our safety team conducts field safety assessments and investigates all "Stop Work Authority," and "Near Miss" occurrences. All PMI team members are empowered to invoke Stop Work Authority – helping to ensure that we do the right thing, the right way, for the right reasons, all the time.

By creating a work environment that is free from risks and hazards, PMI helps to ensure the safety of our team and the quality of our work.

Services:
Cleaning Services supporting Drilling and Production assets and facilities

Solids Control during drilling activities (Zero Discharge/ Closed Loop)

A full range of Environmental Services

CPT Support Services and Rentals

Civil Construction

Shorebase Operation in Morgan City, LA.

Drilling Cleaning Services

PMI Drilling Services Division utilizes technology to consistently Reduce Downtime in marine fleets and drilling rigs, with a perpetual focus on Waste Minimization.

Offshore Supply Vessel Tank Cleaning – MudHog Automated System

Our automated Mud Tank Cleaning System is an innovative process for cleaning mud tanks on marine supply vessels.

MudHog Automated System advantages include:

- Reduced port time / downtime (typical cleaning job 24-48 hours)
- Reduced wash water and flushing water sent for waste disposal
- Reduced extensive man-hours in confined space

Rig Cleaning System

PMI has the experience, expertise and technology to provide customers with the highest quality of both conventional and automated rig cleaning services. We focus on lowering rig cost through reduction of downtime and waste minimization, with a goal to help expedite the demobilization of the rig.

Solids Control

- Multiple innovative waste management solutions to reduce drill cuttings haul-off and disposal volumes, while recovering drilling fluid for reuse in both onshore and offshore applications.
- Processes are engineered to meet and exceed drilling expectations with contingency plans proposed to eliminate rig non-productive time (NPT).
- Our annular cuttings box feed inlet design, used in conjunction with our DNV cuttings boxes, eliminates the need for flipping cuttings box lids on zero discharge projects offshore, allowing for increased Rates of Penetration (ROP) and drastically reducing the potential for HSE incidents.
 - Drilling waste management
 - Zero discharge
 - Cuttings dryers to exceed NPDES requirements
 - Cuttings conveyance vacuums & screw conveyors
 - Centrifuges & shakers
 - 100, 50, & 30 HP explosion proof rig vacuums
 - Explosion proof, diesel-powered pressure washers & screen cleaners

Dry Bulk Tank Cleaning

PMI's diverse fleet of mobile air movers provide our customers with a choice in waste containerization and disposal.

- Guzzler NX – recovers a wide range of materials including barite and cement
- Vector VecLoader – discharges recovered materials directly into a supersack, vacuum box

Consistently
Predictable

Minimize Downtime
of Customer's Assets

Waste Minimization

Leading the way in automated technology.

Production Maintenance Cleaning Services

PMI Energy Services provides a comprehensive range of tank and vessel cleaning services both onshore and offshore.

Services:

- Production Vessel & Process equipment cleaning
- Facility topside prep & decommissioning
- Flex-lancing / drain maintenance
- Hull column / ISIP inspection
- Pipeline & ICP flushing
- Above ground storage tanks
- Printed circuit heat exchanger cleaning
- Confined space entry monitoring & rescue
- Particle filtering for sensitive new fabrication
- Chemical cleaning, pickling & passivation of new and existing heat exchanger piping
- Glycol, amine & heat media system cleaning
- Production vessel internal retrofits
- Equipment rentals—pressure washer, pumps, hoses

NORM Expertise

As an industry leader in Naturally Occurring Radioactive Material (NORM) removal and a full-service solutions company, PMI has comprehensive capabilities to meet our customers' needs.

Our NORM specific license through the Louisiana Department of Environmental Quality (LDEQ) for decontamination, remediation and waste processing ensures that we can handle each customer's unique needs from permitting to project release in multiple states.

The clear choice for Tank & Vessel Cleaning solutions.

Industry experts with over 150 combined years of experience.

Optimize Efficiencies
of Customer's Assets

Waste Minimization

Environmental Services

PMI has a complete package of integrated services to provide our customers with the answers to their E&P, NORM, Chlorides, and other waste concerns, from permitting to project release.

Our experienced team of professionals is qualified to handle all aspects of:

Remediation & Restoration

- Soil (upland, wetland, marsh or underwater)
- Pits (29-B & industrial)
- Total site restoration

Facility Decommissioning & Demolition

- Tanks, vessels & equipment
- Facility structures
- Compressor stations
- Concrete slabs
- Lease roads
- Pipeline abandonment & removal

Land & Facility Environmental Surveys & Assessments

- NORM confirmatory, informational & release surveys
- Environmental assessments & sampling
- Land profiling & sampling
- Wetland & underwater sampling and surveys

NORM, E&P and Other Waste Management

Project Management

PMI Project Support Group provides technical support related to Geographic Information Systems (GIS), coastal and wetland permitting, and preparing regulatory agency closure reports and correspondence.

Extensive project portfolio: offshore and land services.

Creative Planning and Execution

Condense Project Timelines and Maximize Budget Efficiencies

Waste Minimization

Lower Mid-Continent Basin Services

PMI has the ability to successfully execute projects throughout North America. We have personnel and equipment positioned to strategically mobilize to any job location necessary.

Environmental Services

- Tank battery cleaning services
- Spill clean-ups & restorations
- Plug & abandonment well site services
- Site decommission, demolition & restoration services

Solids Control

- Closed loop services
- Rig surface rental equipment

CPT Support Services

(Completion Production Testing)

- Rig up & rig down services of CPT equipment
- Torqueing and lifting technology which reduces safety issues from lifting and hammering

Construction Services

- Build roads, pads, pits and any dirt moving projects needed

Reduce Time in
Confined Spaces

Waste Minimization

Experience and
Expertise

Serving the Permian Basin continuously since 2009.
